Artwork Specifications: Ensure that your artwork is print ready and meets the specifications set out below to ensure that you don't get charged extra for artwork preparation. Most designers are aware of this, but it is always helpful to forward this onto them.

Here are our artwork specifications:

- Artwork should be supplied with bleed at least 3 mm outside of trim marks. Please ensure trim marks are on artwork.

- All text/borders and non-bleeding elements should be 3mm away from the trim edge.
- Artwork should be supplied as a minimum of 300 dpi at 100% print size.
- All fonts should be converted to outlines/paths and colours should be CMYK (except for jobs printed in spot colour).
- All colours are converted to CMYK
